

To: NSF Macrosystems Biology and Early NEON Science Program

From: Peter Vitousek

By signing below, I acknowledge that I am listed as a collaborator on this proposal, entitled "MSB-ENSA: Combining Gradients of Space and Time to Understand Biodiversity Dynamics in the Hawaiian Islands," with Andrew Rominger, Rosemary Gillespie, and Daniel Gruner as the Principal Investigators. I agree to provide access to and information about nutrient fertilization experiments at Thurston (Hawai'i Volcanoes National Park) and Koke'e (Koke'e State Park) for arthropod sampling, as described in the project description of the proposal, and I commit to provide or make available the resources specified therein.

Signed:
